AutomaTech®
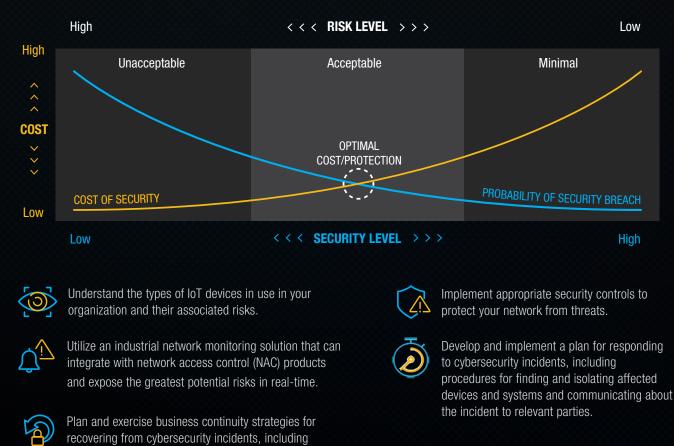

INDUSTRIAL CYBER SECURITY

In today's connected world, industrial companies are continually facing Cyber Security challenges and the need to protect critical equipment. The world of Cyber Security and the many underlying technologies can be overwhelming. AutomaTech understands and we are here to help you best navigate through the obstacles, enabling you to take practical and realistic steps towards securing your critical industrial infrastructure.

We Help Industrial Companies Understand and Address Cyber Security Risks

Understand the types of IoT devices in use in your organization and their associated risks.

Implement appropriate security controls to protect your network from threats.

Utilize an industrial network monitoring solution that can integrate with network access control (NAC) products and expose the greatest potential risks in real-time.

Develop and implement a plan for responding to cybersecurity incidents, including procedures for finding and isolating affected devices and systems and communicating about the incident to relevant parties.

Plan and exercise business continuity strategies for recovering from cybersecurity incidents, including procedures for restoring affected systems and processes and mitigating any potential impacts.
