

## Monitoring-Based Commissioning (MBCx) Demonstration RFP Program:

Eversource Energy is offering financial support for MBCx systems through this RFP Demonstration Program ("Program"). This Application must be submitted to be considered for the Program. This Application must be submitted with a Utility Customer signature before March 31, 2024 to [MBCX@eversource.com](mailto:MBCX@eversource.com).

Incentives Available through this Program:	
	Fault Detection Diagnostics (FDD) Software Installation incentive: lesser of 50% of the eligible FDD software installation cost capped at \$15,000. A \$10,000 Early Completion Incentive will be provided for Applications submitted by December 1, 2023 and qualified Energy Efficiency Measures (EEMs) installed by October 1, 2024. This Early Completion Incentive will be paid upon installation of qualified EEMs.
	Measure Verification Incentive: \$0.17/kwh and \$1.50/ccf (therm in MA) \$1.25/gal delivered fuels.

What should you know before beginning?	
	Customer and MBCx Service Provider (MSP) signatures are required- for ALL Applications. MSP collaborations will require signatures from each participating vendor in the collaboration.
	Heating Ventilation and Air Conditioning (HVAC) controls must have an existing Direct Digital Controls based BAS capable of trending data with significant remaining useful lifetime and ability to interface with FDD software and equipment. If controls need updating/replacing, this work must be completed prior to implementation of FDD software and installed at Customer cost.
	Submitted projects must be completed within the designated timeframe required in this RFP.
	Only external labor costs qualify for FDD Software Installation Incentives; customer internal labor is eligible for Measure Verification Incentives for installed measures at actual labor rates.
	Customers are limited to one Application per site.
	MSP Statement of Qualifications (SOQ) must accompany the Application when submitted. Applications that do not have MSP SOQs will not be considered for this opportunity.

Participation Instructions		
Step	Descriptions	Timeline
<p><b>1</b> Submit Application</p>	<p>Applications and MSP SOQs must be complete and submitted by March 31, 2024* to <a href="mailto:MBCX@eversource.com">MBCX@eversource.com</a>.</p>	<p>September 15, 2023 to March 31, 2024.</p>
<p><b>2</b> Project Development Study</p>	<p>If an Application is approved by the Utility, the Customer and their MSP are offered a Project Development Study Agreement and a \$5,000 fee. The MSP will have 45 days from the Project Development Study Agreement execution date to complete and submit the Study to the Utility. Project Development Studies must be submitted by July 1, 2024 to be considered for an FDD Software Installation Letter of Agreement (LOA). Once Project Development Studies are approved and selected to move forward, the Utility will issue a FDD Software Installation LOA offering FDD Software Installation Incentives to the Customer/MSP.</p>	<p>45 days from executed Study Agreement.</p>
<p><b>3</b> Installation of FDD Software</p>	<p>Once the FDD Software Installation LOA is executed, the Customer and their MSP will begin installation of the FDD software. This installation must be completed before December 6, 2024. The Customer and their MSP will verify the integration of the FDD software with the Customer's building automation system (BAS).</p>	<p>Prior to December 6, 2024</p>
<p><b>4</b> Investigation</p>	<p>The Utility will provide an Investigation Agreement to the Customer/MSP offering a 50% co-pay up to \$10,000. The MSP (or Analytics Vendor) will provide trend data, analysis of trends, and establish a baseline for energy savings calculations of the proposed measures to the Utility.</p>	<p>Prior to December 6, 2024</p>
<p><b>5</b> Measurement and Verification</p>	<p>The Utility will provide a Measure Installation LOA to the Customer after approval of the measures submitted in the Investigation Report. The Customer and/or their BAS Controls Vendor will install approved EEMs and MSP (or analytics vendor) will provide post installation trending data along with supporting energy savings calculations to the Utility for M&amp;V Incentive payment.</p>	<p>Prior to December 6, 2024</p>

\*Applications and SOQs submitted by December 1, 2023 with completed and approved installation of EEMs by October 1, 2024 will be eligible for an additional Early Completion Incentive up to \$10,000.

## RFP HVAC5-2023 - PROPOSAL APPLICATION FORM

UTILITY CUSTOMER (BUSINESS NAME):	
CUSTOMER ADDRESS:	
CUSTOMER PROJECT SITE NAME:
