

Industrial & IIoT Trends Technology Conference

AutomaTech's ThinkBIG 2019 Conferences are here to help Manufacturing & Industrial Companies understand all the buzz surrounding IIoT, The Internet of Things, and Industry 4.0. By attending the conferences, you will gain knowledge on today's trends and learn how to simplify and apply the latest technologies to achieve tangible, positive business outcomes. Think Big and Start Small with AutomaTech ThinkBIG 2019!

Today's Operational Technology continues to evolve and is often overwhelming. ThinkBIG 2019 will help both Technical and non-Technical Industry Professionals understand various applications and technologies. The conferences include interactive discussions, demonstrations, and hands-on education around the latest technologies you can apply to your industrial business to deliver significant value and visibility across your organization.

Key Conference Topics:

- Education on Today's Industrial & IIoT Trends and Technology
- Meet the New GE Industrial IoT Software Company
- How to Make Augmented Reality (AR)...a Reality!
- Cyber Security Including IIoT, Edge, and Remote Connectivity
- Manufacturing Optimization-Focused Sessions & Tracks
- AutomaTech-Education Hands-On Training Sessions
- Interactive Tech Expo & Lightning Stage Technology Demos

Tech Expo:

ThinkBIG includes an interactive Tech Expo exhibit hall featuring the latest industrial technology and innovations from AutomaTech's Strategic Partners and Vendors. See demonstrations of the latest hardware and software solutions while networking with industry experts and your peers. The Tech Expo will feature industry leading vendors, such as GE Digital, MOXA, Stratus Technologies, PTC, Capstone Technologies, Ondas Networks, and many more!

Visit the conference web page <https://automatech.com/thinkbig-start-small/> to view the full agenda and session descriptions.
